

## eXtplorer - PHP-based File Manager - Fehler #104

### extplorer's code has different ways of version checking AND some \$\_VERSION

12/22/2012 08:38 PM - Viktor Szépe

<b>Status:</b>	Neu	
<b>Priority:</b>	Niedrig	
<b>Assignee:</b>	Sören Eberhardt-Biermann	
<b>Category:</b>	ToDo	
<b>Target version:</b>		
<b>eXtplorer Version:</b>	2.1.2	<b>Joomla! Version:</b> Joomla! 2.5
<b>Description</b>		
<p>I suggest one central function that queries Joomla version info for all Joomla version.</p> <p>extplorer.list.php: global \$dir_up, \$mosConfig_live_site, \$_VERSION;</p> <p>seems OK: function ext_isJoomla</p> <p>header.php: if( is_object( \$GLOBALS['_VERSION'] )    class_exists( 'jversion' ) ) {</p> <p>list.php: global \$dir_up, \$mosConfig_live_site, \$_VERSION;</p> <p>a lot of language files: maybe a simple search&amp;replace solves this</p> <p>That is all.</p> <p>All the best wishes to you!</p>
