I'm using it as a single file manager. I like the UI, but there is a problem. When there is a file with file name of Chinese, it can not display the Chinese, even if I using the Chinese lang. How can I fix it? I'm using the 2.1.5

##### #2 - 04/03/2014 05:10 PM - Botu Sun

- File list.php added

Hi,

I've also encountered problem like yours.  
I looked into the //include/list.php and found file names are encoded in utf-8 with

```
utf8_encode($item)
```

with is unnecessary since they were already in utf-8 when read from the file system.  
So just replace every "utf8\_encode(\$item)" with just "\$item" and all characters are well displayed!

Botu

##### #3 - 04/07/2014 08:41 AM - Sören Eberhardt-Biermann

- Category set to Bug

- Target version set to 2.1.6

This will be fixed in version 2.1.6
