

eXtplorer - PHP-based File Manager - Fehler #164

Missing home directory => Directs to root

06/04/2014 02:51 PM - Paul Hasselgren

Status: Neu	
Priority: Normal	
Assignee:	
Category:	
Target version:	
eXtplorer Version: 2.1.4	Joomla! Version: none
Description	
First: thank you for this software. :)	
When a home directory specified in the .htusers.php is missing, then eXtplorer shows the eXtplorer installation directory.	
The version is 2.1.5. Standalone.
