

eXtplorer - PHP-based File Manager - Fehler #333

webdav display UPPER/CASE/FULL/PATH with some webdav client

11/10/2016 02:38 PM - Daniel Roche

Status:	Gelöst	
Priority:	Normal	
Assignee:	Sören Eberhardt-Biermann	
Category:	Bug	
Target version:	2.1.10	
eXtplorer Version:	2.1.4	Joomla! Version: none
Description		
<p>Hello,</p> <p>when accessing to extplorer by webdav the files and directory are displayed in upper case and with the full path.</p> <p>it happen only with some linux client :</p> <ul style="list-style-type: none">- nemo (cinnamon desktop)- thunar (xfce desktop) <p>it does not happen with cadaver CLI tools, nor with windows explorer (i haven't tested unity/ubuntu nor gnome/nautilus)</p> <p>i guess this behavior shows because theses tools are displaying the displayname property instead of the path .</p> <p>however, it seems quite easy to fix :</p> <pre>in libraries/HTTP/WebDAV/Server/Filesystem.php replace (line 215) \$info["props"][] = \$this->mkprop("displayname", strtoupper(\$path));</pre> <p>by</p> <pre>\$info["props"][] = \$this->mkprop("displayname", basename(\$path));</pre> <p>and folders and files are properly displayed. i have tested ok with :</p> <ul style="list-style-type: none">- windows explorer- thunar- nemo- cadaver- macOS finder <p>Best regards</p>
