#### Description

Hello,  
I am trying to download the svn version (3.0) in trunk and my svn client (tortoisesvn (windows 7 integrated))state that it your url does not exist/connect. I would like to look at the code and learn how you have done this great work.  
I'm trying "EXPORT" command to bring your code to my local svn. Is this correct(very little experience with versioning software/systems)or is it "IMPORT" which also said the same thing?  
Thank you  
Christopher M West

#### History

##### #1 - 03/19/2012 01:49 PM - Dinesh Kesarwani

Try to <https://extplorer.net/svn/extplorer/trunk/>

##### #2 - 03/29/2012 12:58 PM - Sören Eberhardt-Biermann

It seems as if the SSL-certificate used on extplorer.net has expired.  
I will update the certificate, so you can connect via HTTPS again.
