Category:	Bug	
Target version:	2.1.0	
eXtplorer Version:		Joomla! Version:
Description		
<p>I'm testing 2.1 RC5 and as I can see Search doesn't work. In version 2.0 everything was OK.</p> <p>By the way - also there's something wrong with Filter. In previous version it was working OK - after using the filter all matching folders/files were displayed. Now it displays only first matching folder/file from the list.</p>
