<b>Description</b>		
<p>I'm using joomla 2.5 and extplorer 2.1.</p> <p>I'm trying to archive the whole of my joomla folder (from the root). The error "An unknown Error occured" occurs at any time during the archiving process (ie: the file .tgz is created, the file .tgz.tmp is also present when archiving process managed to start (sometimes up to 69%)). Starting the same command again and again ends up with this error.</p> <p>However, when I archive each sub-folder, either alone or grouped with others (ie: smaller amount) it's OK.</p> <p>I did it with the box "upload" unchecked.</p> <p>It's must be a timer delay or something.</p> <p>Thanks</p> <p>Anne-Marie</p>
