<b>Description</b>		
Hello		
eXtplorer (up to v2.1.0) fails to support file or folder names containing extended characters such as é (é), É (éEacute;), “ (”), ’ (’) and ” (”).		
Yet these characters ARE allowed under Win/Mac/Linux filesystems, so there should be no reason do discard them.		
To reproduce the issue, simply create a folder named		
<code>test [ ' éÉ+“ ’ ” ]</code>		
and, under this folder or under another "regular" folder, create/copy a text file named		
<code>test [ ' éÉ+“ ’ ” ].txt</code>		
Hope you can fix this.		
Thanks in advance

Hello
eXtplorer (up to v2.1.0) fails to support file or folder names containing extended characters such as é (&eacute;), É (&Eacute;), “ (&ldquo;), ’ (&rsquo;) and ” (&rdquo;).
Yet these characters ARE allowed under Win/Mac/Linux filesystems, so there should be no reason do discard them.
To reproduce the issue, simply create a folder named
<code>test [ ' éÉ+“ ’ ” ]</code>
and, under this folder or under another "regular" folder, create/copy a text file named
<code>test [ ' éÉ+“ ’ ” ].txt</code>
Hope you can fix this.
Thanks in advance
