Target version:		
eXtplorer Version:	2.1.4	Joomla! Version: Joomla! 3.1
Description extplorer works beautifully using admin/admin. when I try to change password, modify or add I receive message "updated successfully" despite the fact that no information was saved or added. There doesn't seem to be anywhere for extplorer to store the information. Apparently I missed some step in the installation procedure. Please inform me what is required.
