<b>Target version:</b>	
<b>eXtplorer Version:</b> 2.1.4	<b>Joomla! Version:</b> Joomla! 3.1
<b>Description</b> extplorer works beautifully using admin/admin. when I try to change password, modify or add I receive message "updated successfully" despite the fact that no information was saved or added. There doesn't seem to be anywhere for extplorer to store the information. Apparently I missed some step in the installation procedure. Please inform me what is required.
