<b>Target version:</b> 2.1.15	
<b>eXplorer Version:</b> 2.1.14	<b>Joomla! Version:</b> Joomla! 3.9
<b>Description</b> I updated eXplorer from 2.1.13 which was working to 2.1.14. Now the browser shows a blank page when calling eXplorer from Joomla backend and Firefox network monitor shows a HTTP 500 error. Interestingly, I do not see any error details though I set error mode to detailed in web.config of IIS 10. Joomla 3.9.24 is running with PHP 7.4.15.
